Notes:

- All 2021 dates are tentative and included for discussion purposes.
- Future calendar year dates can be proposed by continuing a similar pattern of selecting a weekend late in the first quarter of the year, and the first weekend of the last quarter, with the AWW’s spaced equally (approximately 6-8 weeks) apart.
- General breeding season for gnatcatchers, which typically occur in coastal sage scrub, and other migratory birds is February 15th to August 30th. However, the breeding season for wetland-associated birds, including Least Bell’s Vireo and Light-Footed Clapper Rail, March 15th to September 15th.
- Italicized dates and projects have been added to the calendar, revised, or are tentative.
